

CONSTRUCTION SURVEYING

Layout, control, grades and as-builts for buildings, civil works and infrastructure — accurate field positioning that keeps construction moving.

WHAT PCI PERFORMS

- Construction layout and staking
- Building, foundation and anchor-bolt layout
- Gridline and column-line layout
- Survey control networks and site benchmarks
- Elevation control and grade staking
- Civil infrastructure and underground utility layout
- Manhole, catch-basin, pipe and culvert layout
- Road and earthworks layout
- Construction progress and monitoring surveys

DELIVERABLES

- Field layout marks, stakes and offsets with cut/fill information
- Control network and benchmark summaries
- Layout reports and point lists
- As-built drawings and comparison reports
- Volume and quantity calculations
- CAD, CSV and PDF deliverables compatible with your workflow

HONEST LIMITATIONS

Construction survey deliverables support building, civil and engineering work; they are not legal survey plans or Real Property Reports.
