

MINING SURVEYING

Survey support for mines and exploration projects — control, volumes, LiDAR topography, stakeouts and reclamation documentation in demanding terrain.

WHAT PCI PERFORMS

- Mine site control networks
- Drill pattern and blasting stakeouts
- Ore limit and pit surveys
- Production and inventory volumes
- LiDAR and drone topography
- Exploration grid and DGPS surveys
- Road, pad and infrastructure layout
- Reclamation and closure documentation surveys

DELIVERABLES

- Control networks and coordinate systems documentation
- Volume and production reports
- Terrain models, contours and pit surfaces
- Stakeout reports
- Reclamation survey records
