

SEWER CAMERA & SONDE LOCATING

Camera inspection and sonde tracing of sewers, drains and ducts — locate non-conductive lines and see their condition from the inside.

WHAT PCI PERFORMS

- Sewer and storm line camera inspection
- Sonde tracing of non-conductive pipes
- Septic and drainage line locating
- Duct and conduit tracing
- Blockage and break location
- Depth and alignment mapping of traced lines

DELIVERABLES

- Surface markings of traced alignments and depths
- Inspection video and condition notes
- Located blockage/break positions
- Mapping integrated with locate reports

HONEST LIMITATIONS

Camera and sonde tracing requires an access point and a passable line; heavily blocked, collapsed or inaccessible pipes may limit how far a line can be traced.
